Grant

P/N -058 rotor brake accumulator bracket use is approved for TAS D fleet use as per below.

Dave

Case Number: C0086809  
Customer: Thai Aviation Services Limited  
Aircraft S/N: 761XXX  
Model: S-76D  
ATA: 63  
Part Number: 76650-02001-062  
Case Subject: Rotor Brake Accumulator Bracket -058 In Lieu Of -062

### Problem Description:

Reference

- 1) Case C0085949
- 2) S-76C IPC CH 66-50-00

Per Case C0085949 TAS reported a cracked P/N 76650-02001-062 rotor brake bracket on A/C S/N 761060.

TAS stop-drilled the bracket. SCI has quoted a lead time of 131 days for a replacement.

TAS now reports finding a similarly cracked bracket on A/C S/N 761063 and a bracket with branching cracks on 761064.

TAS has grounded 761064 as the cracking is too extensive to stop drill.

TAS expects to find further cracks on brackets installed on 761059 and 761066.

Reference to S-76C IPC Chapter 66-50-00 Fig 1, Page 8, Item 58 shows that bracket dash numbers 76650-02001-058 and -062 are approved for use on the C model.

SCI has Qty 23 P/N -058 brackets in stock, as confirmed by TAS's on-site Sikorsky LSR.

This is to request on an AOG basis SA approval to install P/N 76650-02001-058 rotor brake accumulator brackets on S-76D-model A/C in the TAS fleet (D59, D60, D63, D64 and D66) until such time as a -062 bracket for each A/C is received from SCI. EoM

This email notification is provided as the case has been reviewed and does not contain technical data in the issue description.

Hi Dave

We now have 3 a/c with these cracked. Some serious. I think we need to ask for approval to use the -058 please. HVE and HVF now have cracked also. HVF is multiple so stop drilling is not an option. Thx

Regards,
